

USING SMART BOARDS TO TEACH INFORMATION LITERACY

Carol R. Gehringer
GRACE Christian School
Raleigh, NC
cgehringer@gracechristian.net

Presented at
Librarian to Librarian Networking Summit
January 2011

BACKGROUND

- Our school has two campuses – one for K-6, one for 7-12, with a library on each campus.
- In August 2009, we got 8 SMART Boards -- three classrooms and 1 SMART Board lab on each campus.
- The libraries do not have a SMART Board but I use it at least once a month for lessons.

HOW DO WE USE IT?

- Demonstrate new library automation system (DESTINY) and databases (ProQuest, FactCite, PebbleGo) without tying up the computer lab (K-12).
- Teach about copyright and plagiarism, and write bibliographic citations as a class (2nd grade and up).
- Plan research strategies using Super3, Big6, and graphic organizers (2nd grade and up).

HOW DO WE USE IT?

- Search online resources and evaluate websites together (5th grade and up).
- Teach how to paraphrase / summarize / synthesize by doing it.
- Listen to podcasts and MP3 files, and play games (Genre Jeopardy).

HOW DO WE USE IT?

- Identify parts of a diagram / chart / map.
- Watch DVDs (our PE teacher uses it to teach square dancing!).
- Use for library orientation, teaching DDC, and more.

FORMATS

- MS Word
- Adobe PDF
- MP3
- SMART Notebook
- Websites

BENEFITS TO USING SMART BOARDS

- Students are more engaged – it grabs their attention, even with the same information on the paper in front of them.
- More senses are involved, especially touch, sight, and hearing.
- Tactile learners reinforce learning by touching the board, while visual learners reinforce learning by taking notes on the board.

BENEFITS TO USING SMART BOARDS

- Visual and hearing impaired students can do things not possible on regular computers due to the size of the computer screen.
- Teachers and students can make notes using digital ink for later use.
- IEPs and differentiated instruction is enabled.
