# Why Use GPS in the Classroom?

Sarah Steele, Curriculum Materials/Media Librarian, Campbell University  
Karen Waller, Media Specialist, Timber Drive Elementary School

# What is the Global Positioning System (GPS)?

- These are a group of 24 satellites started in 1978 by the US Navy to locate people and things around the world.
- The United States Department of Defense maintains the GPS, but anyone with a receiver can use them.

# How does GPS Work?

- President Clinton made available to the public in 2000
- Mathematical principle called **trilateration** or **triangulating**

**Source:**

<http://electronics.howstuffworks.com/gadgets/travel/gps.htm>

# Uses of GPS

- Agriculture
- Aviation
- Disaster surveys
- Ground transportation
- Marine
- Military
- Public Safety
- Rail
- Recreation
- Surveying
- Space
- Timing

# How will we use GPS?

We will use the Global Positioning System to understand that latitude and longitude are actual addresses to a place, which is the absolute location. We will also introduce a fun family hobby – geocaching!

## What is Geocaching?

Geocaching is high-tech hide and seek using a GPS receiver to find hidden caches. It has been called the new sport for the 21<sup>st</sup> century!

### **What is a cache?**

A cache is usually a waterproof container filled with a log book and sometimes prizes.

Source: <http://www.geocaching.com/>

# How do you Geocache?

- Select a cache from a geocaching website that is near where you want to search.
- Gather your equipment.
- Enter the latitude and longitude coordinates (or waypoints) in to the GPS.
- Take an adult, drive as close to the area as possible, then hike to the site using your GPS receiver to lead the way.

- Once you get to about 10 feet, turn on your detective skills and search for the cache.

*Think like a geocacher!*

*Watch out for geomuggles!*

- After finding the cache, sign the logbook, if you take an item, put something back.
- Most importantly, put the cache back in the exact spot you found it!

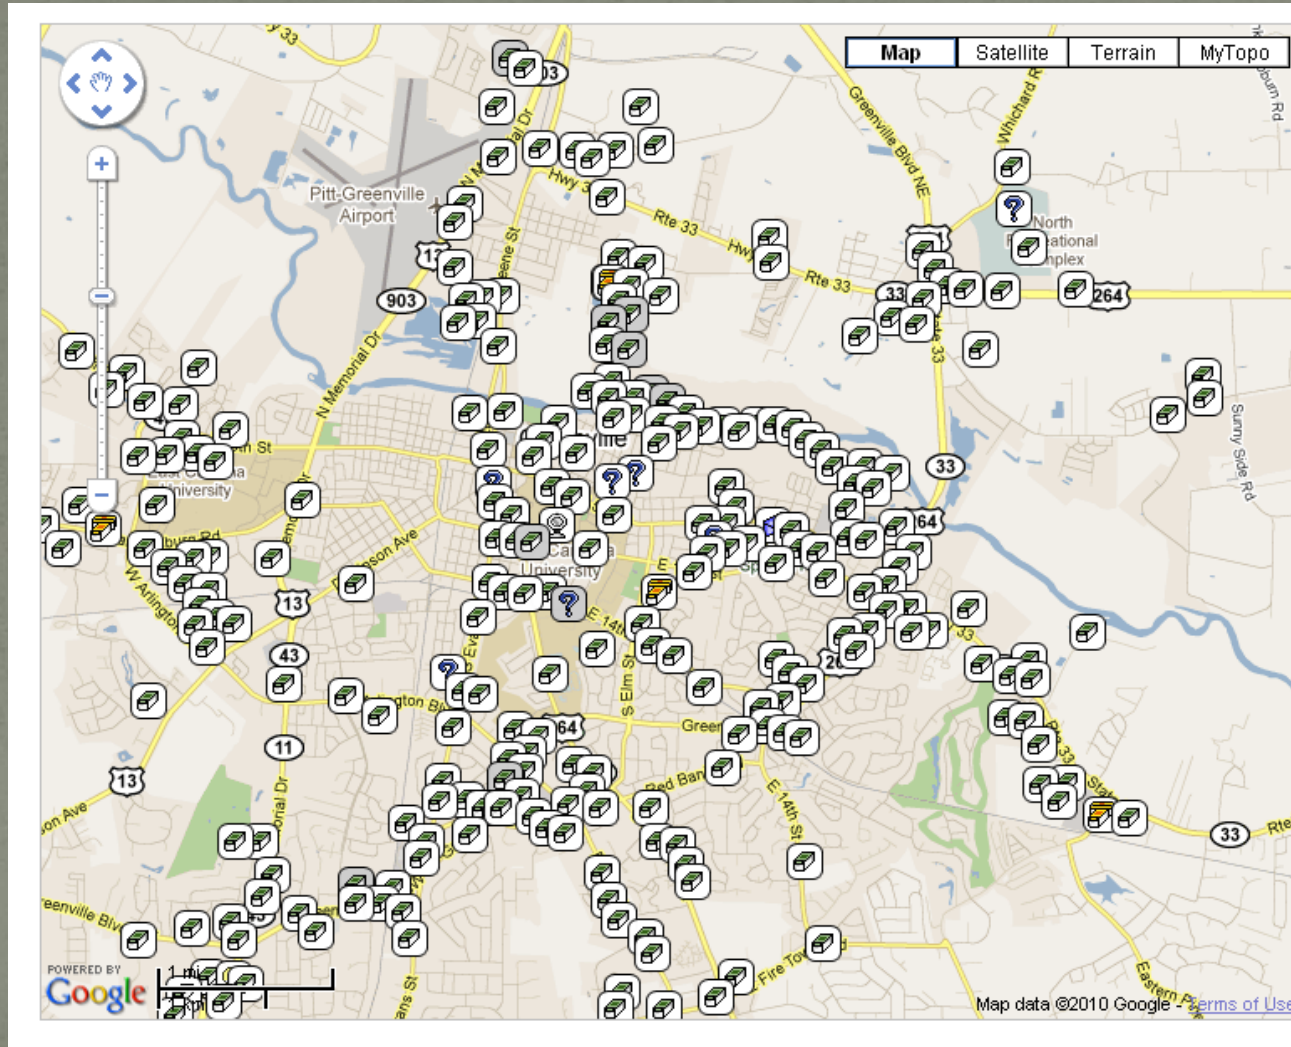

# Geocaching Guidelines

- Have someone with you!!!!
- Tell someone where you are going!
- Be aware of your surroundings.
- Take water.
- Mark your starting point with your GPS.
- Respect the environment and the site.
- Don't forget to post your find and comments about the cache on the internet, but remember avoid "spoilers."

# Using GPS in the Classroom

“Tell me and I'll forget; show me and I may remember; involve me and I'll understand.”

-Chinese Proverb

- Dropout Rate!

# How is GPS useful to students?

- Facilitates inquiry-based learning
- Adaptable for any subject area
- Improves technological proficiency
- Fosters innovative instruction
- Increases student motivation

# Let's Try Ourselves

Joyner Library

Source: Google Maps

# Getting Started!

- Press the flat button on the right side of the GPS. Hold until it powers on.
- Press the Page button to navigate to the Main Menu.

# Pages

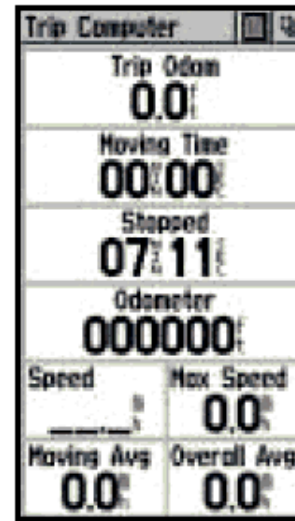

Satellite Page

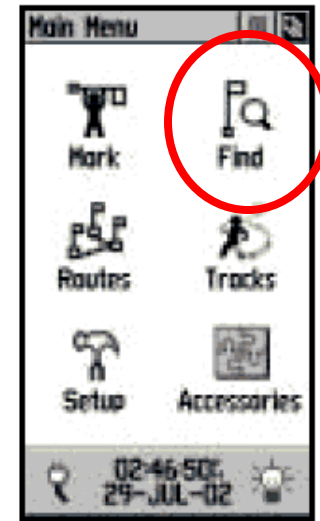

Map Page

Navigation  
Page

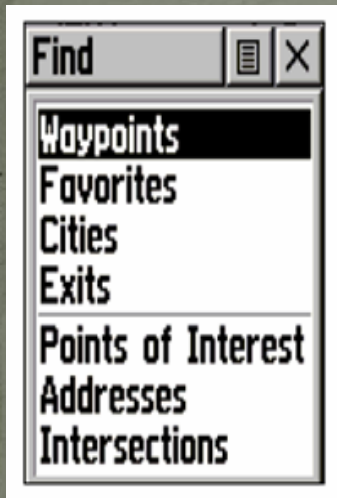

Trip Page

Main Page

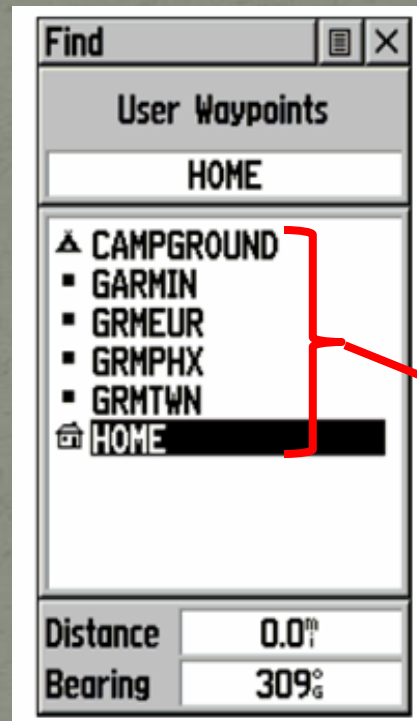

# Finding a Waypoint

1. Choose  
**Waypoints**

2. Choose  
**Nearest**

3. Choose from  
List

Ours will  
say:

- RED
- YELLOW
- BLUE
- GREEN

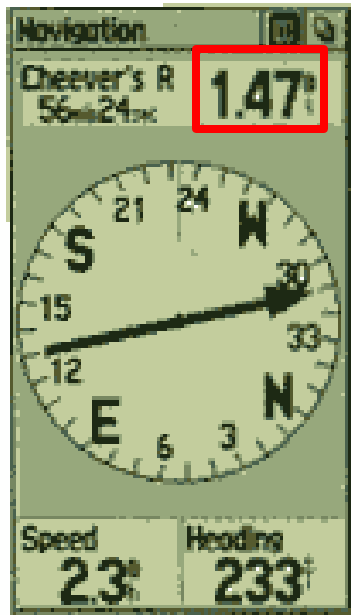

Using the click stick select

- Select “Goto”  
at the bottom of the screen..

# Helpful Hints!

- Check to see if you are 15 feet or .15 miles
- Walk 5 steps to orient the compass
- Move in the direction that the compass arrow is pointing.

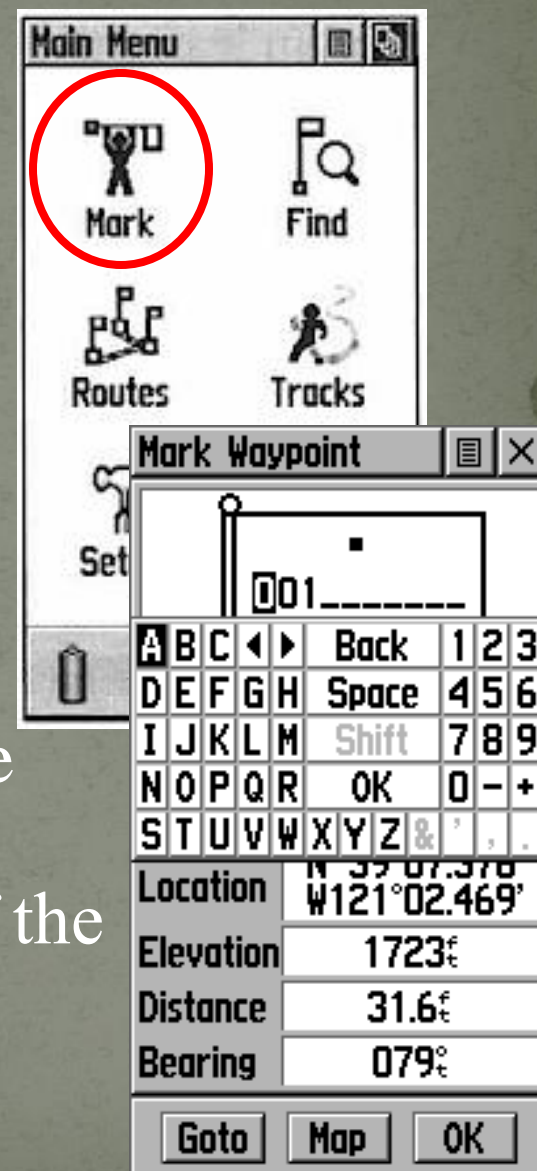

Navigation page

- *Think like a geocacher!*
- *Watch out for geomuggles*

# Marking a Geocache you hide!

- Stay with the group and within the boundaries set forth.
- Do not hide it in an area that has mud, standing water, briars, poison ivy, dangerous, etc.
- Finding a good hiding space.
- On main menu, click **MARK** over the space that your cache is hidden.
- Click inside the flag to name your cache using the abc keyboard. Click “OK”
- Then click “OK” again at the bottom of the screen to get back to main menu.

Oh the Places you will Go...
