

Materials Guide

As a general rule Prestige SpaceSaver will cut anything that scissors will cut. However, the machine bearings will last longer if the machine is not overloaded. The number of sheets that it will cut depends on the thickness of the material to be cut and the size and complexity of the die design. **Use only one sheet of material when cutting with Crease Rule Dies.**

Number of pieces that can be cut at once:

- 1 Aluminum .016"
- 1 Balsa Wood 3/32"
- 1 Basswood
- 1 Brass .005"
- 1 Bubble Wrap
- 8 Butcher Paper
