

Joyner Library Procedure Manual

300.10.75

Subject: Circulation Procedures: North Carolina Depository Microfiche

Title: NC Collection – Depository Microfiche Operational Procedure - Date Adopted by the Library Services Faculty: May 4, 1989

Date Revised: October 31, 1991, February 3, 2005, November 5, 2020

The North Carolina Depository Microfiche Collection consists of microfiche that was supplied under the North Carolina State Depository Law, G.S. 125-11. Due to the decrease in documents published by the state and the advent of a digital repository, ECU is now only a partial repository for print documents of the NC State Publications Clearinghouse and this microfiche collection is no longer updated. The purpose of the existing collection is to provide fair and equal access to the largest number of patrons; therefore, Microfiche is restricted to in-library use.

To facilitate the availability to North Carolina citizens, the North Carolina depository materials are not copyrighted. Fiche duplicates may be obtained at a nominal cost. Paper copies or digital scans may be made using the appropriate machines in the library.

Upon request, the Circulation & Interlibrary Loan Department will make paper copies, digital scans, or will duplicate the fiche to send to other libraries.
